**GUIDANCE NOTES**

*Readings between 0 - 15% - no cause for concern.*

*Readings between 15 - 20% - require further investigation. Compare with the caravan average reading. Consider asking to recheck the area in three months.*

*Readings greater than 20% - will identify areas needing remedial work. There may be early signs of water ingress or evidence of moisture. Again it may be worth considering a recheck after three months. When readings go above 30% then structural damage may be occurring and deterioration is inevitable.*

**COMMENTS & RECOMMENDATIONS**
